AI Assistants

One system for your whole clinic day

A patient books online or walks in, gets a token, sees the doctor, receives the prescription on WhatsApp, pays by UPI — and is reminded when to come back. Reception, doctors and accounts all work on the same screen, and every record stays with you forever.

AI + automation

Routine work runs on its own; patients get it all on WhatsApp.

Website included

50+ professional designs on your own domain, with online booking.

Live in days

Setup, data migration and staff training are included.

Plain and simple

Your reception learns it in an afternoon — no jargon.

Your data is yours

Secure cloud, daily backups, role-based access, export anytime.

Real support

Help on WhatsApp and phone whenever your team needs it.
